

SOFTWARE VERIFICATION, VALIDATION AND TESTING

FASHION&FRIENDS

FASHION&FRIENDS

Prepared by:

Fadi Egho

Proposed to:

Samed Jukić, Assist. Prof. Dr.

Aldin Kovačević, Teaching Assistant

Date of submission

22.01.2022.

TABLE OF CONTENTS

Generate your table of contents here.

1. Introduction

1.1. About the Project

The tested page is the Fashion Friends page in Bosnia and Herzegovina. This page has great design and great functionalities, which I tested. The page allows users to have their own profile and make orders to their address.

Link: <https://www.fashionandfriends.com/ba/>

1.2. Project Functionalities and Screenshots

1. Registration and login

These are common functionalities for pages. User can create their own profile and login on it.

The screenshot shows the 'Prijava korisnika' (User Login) page of the Fashion Friends website. The page is divided into two main sections: 'REGISTROVANI KORISNICI' (Registered Users) and 'NOVI KORISNICI' (New Users). The 'REGISTROVANI KORISNICI' section contains a login form with fields for 'Email adresa' and 'Lozinka', a 'Zapamti me' checkbox, and a 'Prijava' button. The 'NOVI KORISNICI' section contains a text block explaining the benefits of creating an account and a 'Kreirajte korisnički nalog' button. The page features a navigation bar with categories like 'ŽENE', 'MUŠKARCI', and 'DJECA', and a footer with a newsletter sign-up link and an 'Activate Windows' watermark.

Prijava korisnika

REGISTROVANI KORISNICI

Ukoliko imate nalog, prijavite sa koristeći svoju email adresu.

Email adresa *

Lozinka *

☐ Zapamti me

Prijava [Zaboravili ste lozinku?](#)

NOVI KORISNICI

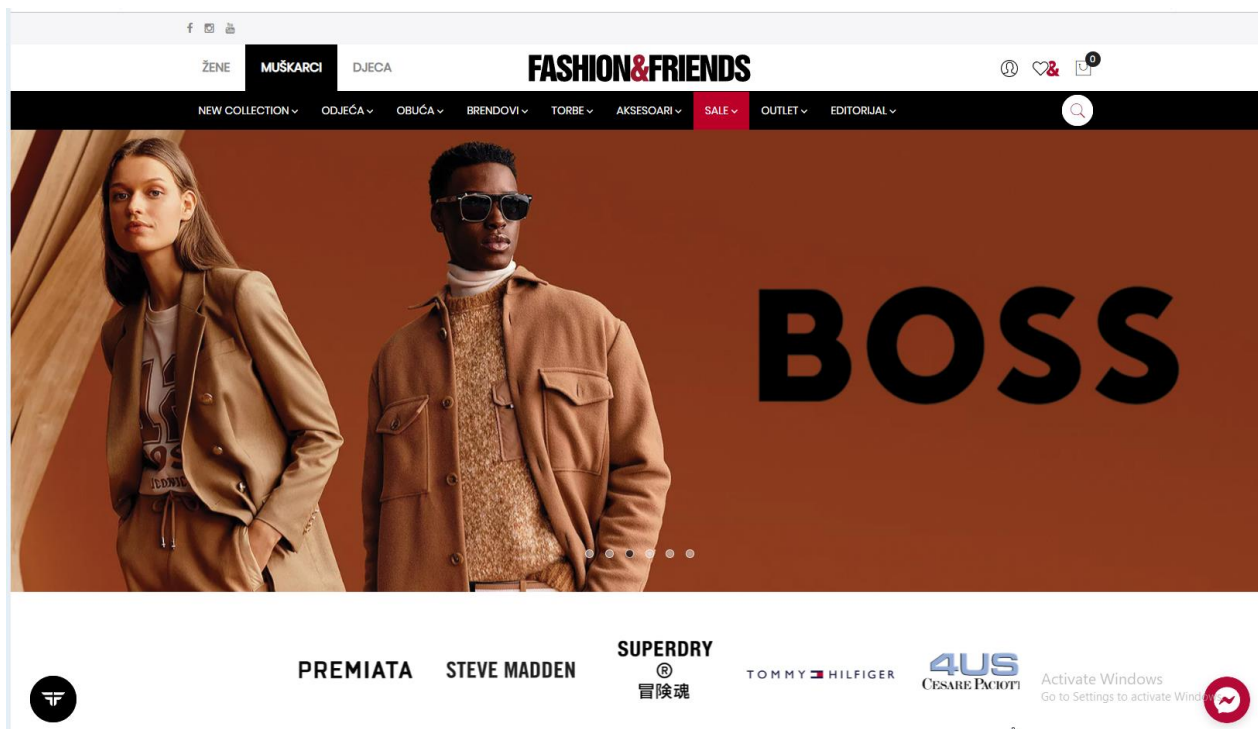

Kreiranjem naloga u našoj prodavnici bićete u mogućnosti da brže prolazite kroz proces naplate, čuvate veći broj adresa za dostavu, pregledate i pratite porudžbine na Vašem nalogu i još mnogo toga.

Kreirajte korisnički nalog

PRIJAVA NA NEWSLETTER

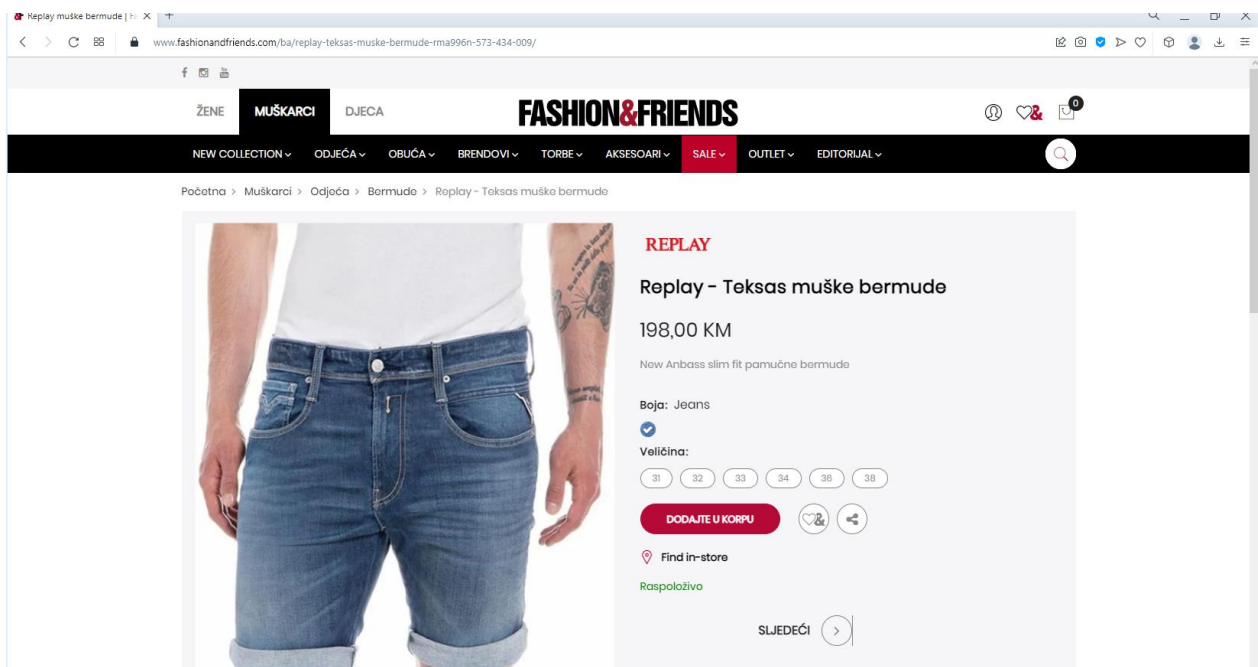

2. Choose what you want to buy.

This page gives you multiple options about clothing. With a simple click, you can choose what interests you from many options (clothes, shoes, backpacks, brands)

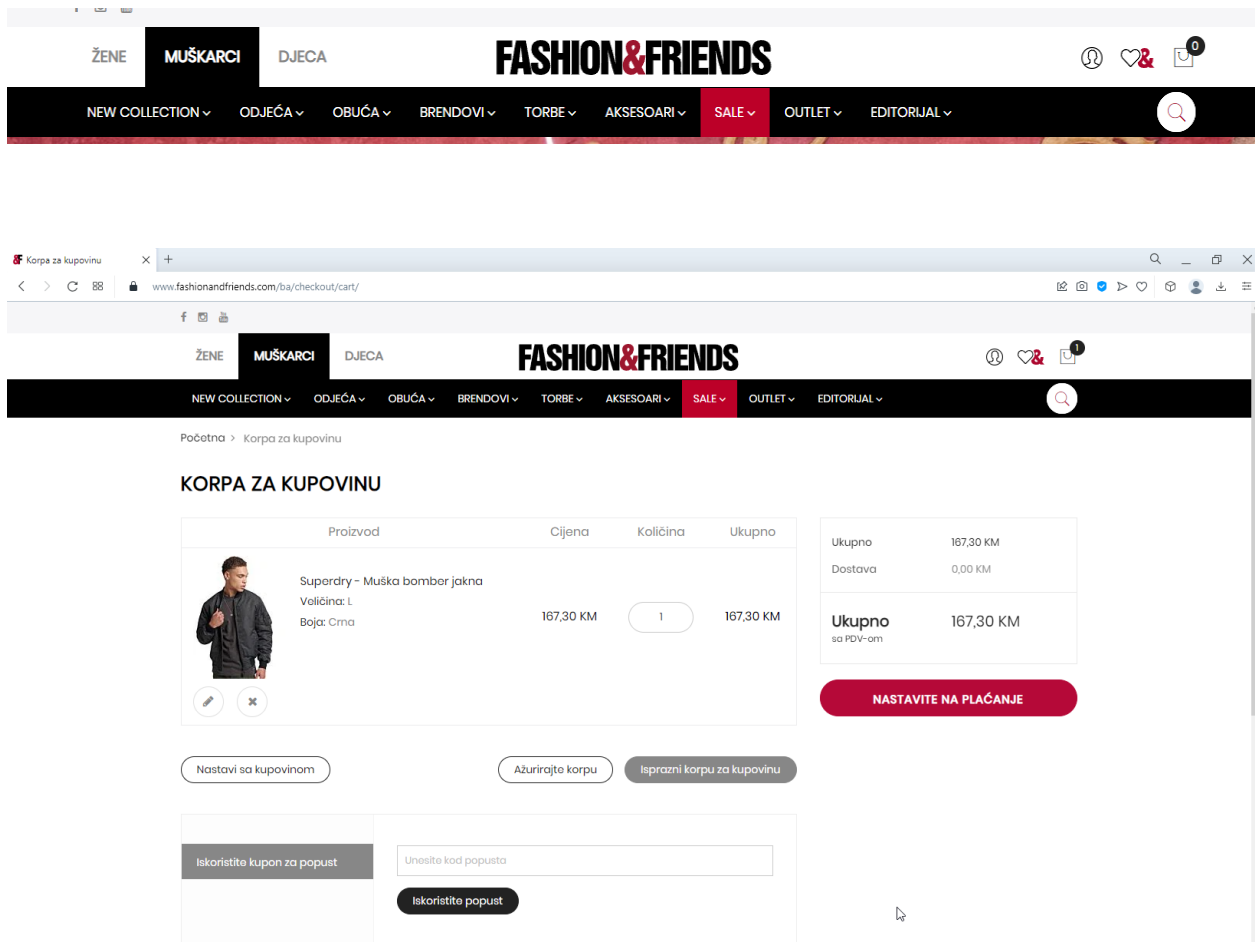

3. Putting something in the shopping cart

By clicking on this page, you add your items to the cart, which updates with your click.

4. Checking the cart and placing the order

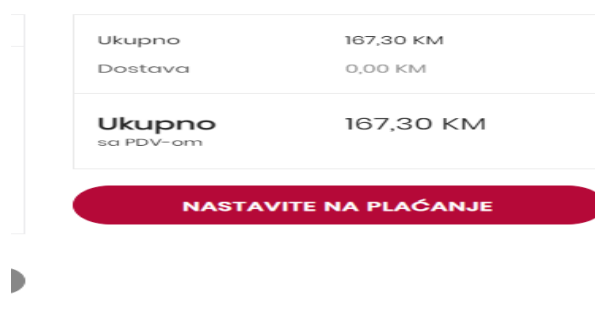

To check the cart, click on the cart in the upper right corner.

After clicking on the cart, it shows you the final price and the items you put in it.

By clicking "Continue with Payment," the page asks you to fill out some basic information.

so they can send you an order.

2. Test Plan

2.1. Scope

I plan to test some of the basic functionalities on this page that are necessary for a clothing store.

My strategy was to begin with the fundamentals and work my way up with each new test.

2.2. Testing Environment and Tools

Tests are written in the Java programming language, as part of which we have implemented Selenium as a dependency in order for it to be successfully executed in Eclipse.

3. Test Execution

3.1. Test Scenario Name

Test Name: Test Title and Click				
Pre-condition(s): Maximize page				
Test Steps: 1. Go to the site page. 2. Click on the button “Muškarci”. 3. Get the title from “Muškarci”. 4. Check if title is equal as given title. 5. Click on the button “Žene”. 6. Check if title is equal as given title. 7. Click on the button ”Djeca”. 8. Check if title is equal as given title.	Test Data: /	Expected Result: Test returns true titles on the page are equal to the given titles.	Actual Result: Test returns true titles on the page are equal to the given titles.	Status: PASS
Notes:				

```

34 • @Test
35
36 void test1TitleClick() throws InterruptedException {
37     webDriver.get("https://www.fashionandfriends.com/ba/");
38     WebElement muskarci=webDriver.findElement(By.xpath("//*[@id=\"ui-id-8\"]/span[1]"));

}
}

```

Test Name: Test Sourca

Description: Check if some texts is in source of Page

Pre-condition(s): Maximize page

Test Steps:

1. Go to the Fashion Friends main page.
2. Take the source from that page.
3. Test if the source contains "žene".
4. Test if souce contains "Nemanja Bilbija je najbolji špic na svijetu."

Test Data:

/

Expected Result:

Text is found in the page's source, the test returns true.

Actual Result:

Text is found in the page's source, the test returns true.

Status:

PASS

Notes: /

```

@Test
void test3Souca(){
    webDriver.get("https://www.fashionandfriends.com/ba/");

9. Conclusion

9.1. Testing Summary

Testing Tool	Total Tests	Passed Tests	Failed Tests
Eclipse	10	10	0

9.2. Final Thoughts

This project was very interesting and sometimes stressful because of problems with XPATH. I don't have any suggestions about the page. I think it worked very well.
